

DR. GREER'S TOOTHPASTE BUYING GUIDE

Our office researched toothpastes to determine which products best meet your needs. We recommend toothpastes with low "abrasivity" for all of our patients. The toothpastes in this guide have low to medium abrasivity ratings. We recommend **COLGATE TOTAL** as best for general adult use.

SPECIAL NEED	BRAND	RECOMMENDED FORMULA	BENEFIT
GUM HEALTH	COLGATE	TOTAL	Antibacterial & low abrasive
DECAY PREVENTION	TOM'S OF MAINE	ANTICAVITY FORMULA	Contains Xylitol with no SLS
HIGHLY CAVITY PRONE	GC**	MI PASTE PLUS	Strengthens & remineralizes enamel
EVERYDAY SENSITIVITY	SENSODYNE	PRONAMEL	Low abrasive; strengthens enamel
EXTREME SENSITIVITY	NUPRO AND GC**	SOLUTIONS & MI PASTE PLUS	Deep remineralizing
Allergy prone	SENSODYNE	PRONAMEL	Contains no SLS or Tarter Control

NUPRO and GC products are only available for purchase through our office.**

Toothpastes with the ADA seal are within the recommended abrasivity range, however not all toothpastes are ADA tested.

AVOID THESE INGREDIENTS:

"Tarter control" may cause irritation.

"Sodium Laural Sulfate" may cause irritation

"Whitening" agents are often highly abrasive. No formula actually whitens teeth!

"Methylparaben" has been linked to cancer.
